To Whom It May Concern,

I, Scott Tracy(ATM), have had the opportunity to observe the software for the Stanwyck Avionics Inc.(SAI) AWOS display system for the past several years and, as a controller, have found the potential of such a system in the Air Traffic Control environment. It's graphics display of AWOS data is not only pleasing to the eye but also quick and easy to understand. With a superb dedication to the system's success, Bill Stanwyck has provided us with a tool that has unlimited potential by integrating it with Internet accessibility. Bill has also maintained our ILS Monitor, which also has proven its reliability over the years.

Scott Tracy
Air Traffic Manager
