

Chester County Area
Airport Authority

March 27, 2014

To whom it may concern:

Stanwyck Avionics has been maintaining the AWOS at the Chester County/G.O. Carlson Airport (MQS) for the Chester County Area Airport Authority (CCAAA) for more than 17 years.

Prior to Stanwyck Avionics being hired by the CCAAA, we had an Artais weather check system, and the technician that was maintaining that piece of equipment passed away. The first technician we called, made one visit to MQS, and informed us that we were too far from his home, and that he would not return. We then called Bill Stanwyck, and the CCAAA has been with Stanwyck Avionics ever since.

Mr. Stanwyck is honest and fair, and has always gone above and beyond the call of duty to assist the CCAAA, including the loan of equipment, to help us verify a discrepancy in our ceilometer .

In 2004, our ageing ceilometer was no longer supported by Artais. Bill upgraded our system with our current Allweather AWOS.

In closing, I just want to let you know that Stanwyck Avionics has been a valuable asset to MQS and the CCAAA, and that I would recommend Stanwyck Avionics, Inc. without hesitation.

Sincerely,

Douglas Eadline

Airport Maintenance/Safety Supervisor
Chester County/G.O. Carlson Airport
